- Communicate complex research and strategic insight to academic, executive, and policy audiences
- Apply the highest standards of ethical practice and sustainability across all professional decisions
- Contribute new theoretical and practical knowledge to the field of business administration

FAQs

Who should consider a DBA?

Experienced business professionals, senior executives, consultants, and academic scholars seeking to sharpen executive and research capability without stepping away from their careers.

What are the admission requirements?

A relevant Master's degree, demonstrated English proficiency (or applicable waiver), basic digital competence, and relevant professional experience. Prior learning is assessed under the Recognition of Prior Learning policy.

Can I transfer credits from another institution?

Credits from accredited institutions are generally eligible for transfer, subject to review by the admissions team.

What happens if I don't complete the full programme?

Candidates who complete two years but do not finish the doctorate are eligible for the MPhil (MQF Level 7) exit award.

How is the programme delivered?

Entirely online, in academic partnership with the university network, structured around milestones designed for full-time working professionals.
